

# Cellular and Molecular Neurobiology—Volume 17, 1997

*Cellular and Molecular Neurobiology* publishes original research articles concerned with the analysis of neuronal and brain function at the cellular or subcellular levels. The journal welcomes articles utilizing anatomic, genetic, physiologic, pharmacologic, or biochemical approaches to the study of neuronal function and oriented to the analysis of elementary mechanisms. Studies of isolated mammalian tissues, and intact animals, with investigation aimed at the molecular mechanisms or neuronal responses at the level of single cells, are accepted for publication. The journal also presents studies of the effects of neurons on other organ systems, such as analysis of the electrical or biochemical response to neurotransmitters or neurohormones on smooth muscle or gland cells.

## EDITOR

**Juan M. Saavedra**, National Institute of Mental Health, Bethesda, Maryland

## ASSOCIATE EDITORS

**Masami Niwa**, Nagasaki University School of Medicine, Nagasaki, Japan

**Mordechai Sokolovsky**, Tel Aviv University, Tel Aviv, Israel

## EDITORIAL ADVISORS

**Julius Axelrod**, National Institute of Mental Health, Bethesda, Maryland

**David O. Carpenter**, New York State Department of Health, Albany, New York

**Marshall Nirenberg**, National Institutes of Health, Bethesda, Maryland

## EDITORIAL BOARD

### Cellular Neurobiology

**Edson X. Albuquerque**, University of Maryland, Baltimore, Maryland

**Hugo Arechiga**, Instituto Politecnico Nacional, Mexico City, Mexico

**Mary A. Bittner**, University of Michigan Medical School, Ann Arbor, Michigan

**J. Edwin Blalock**, University of Alabama, Birmingham, Alabama

**David A. Brown**, University College London, London, England

**Alejandro De Nicola**, Institute of Biology and Experimental Medicine, Buenos Aires, Argentina

**Peter W. Gage**, Australian National University, Canberra, Australia

**Helmuth L. Haas**, Heinrich-Heine-Universität, Düsseldorf, Germany

**Thomas K. Hughes, Jr.**, University of Texas Medical Branch, Galveston, Texas

**Boris Khorodov**, Vishnevsky Surgery Institute, Moscow, Russia

**Konosuke Kumakura**, Sophia University, Tokyo, Japan

**Andrea Levi**, Istituto di Neurobiologia, Rome, Italy

**Giulio Levi**, Istituto Superiore di Sanita, Rome, Italy

**Carlos Libertun**, Institute of Biology and Experimental Medicine, Buenos Aires, Argentina

**Robert L. Macdonald**, University of Michigan, Ann Arbor, Michigan

**John S. McReynolds**, University of Michigan, Ann Arbor, Michigan

**Andrés Negro-Vilar**, Wyeth-Ayerst Research, Radnor, Pennsylvania

**Masami Niwa**, Nagasaki University School of Medicine, Nagasaki, Japan

**Yasuyuki Nomura**, Hokkaido University, Sapporo, Japan

**Donald G. Payan**, University of California School of Medicine, San Francisco, California

**Jorge E. B. Pinto**, Buenos Aires, Argentina

**Julia M. Polak**, University of London, London, England

**Joel Premont**, College de France, Paris, France

**Rami Rahaminoff**, Hebrew University, Hadassah Medical School, Jerusalem, Israel

**Donald J. Reis**, Cornell University Medical School, New York, New York

**Michael A. Rogawski**, NINCDS, Bethesda, Maryland

**Dmitri Sakharov**, Academy of Sciences, Moscow, Russia

**Brian M. Salzberg**, University of Pennsylvania School of Medicine, Philadelphia, Pennsylvania

**Philip A. Schwartzkroin**, University of Washington Medical School, Seattle, Washington

**Eric M. Smith**, University of Texas Medical Branch, Galveston, Texas

**George B. Stefano**, State University of New York, Old Westbury, New York

**Ladislav Tauc**, Centre National de Recherche Scientifique, Gif-sur-Yvette, France

**Walter Zieglängsberger**, Max-Planck-Institut für Psychiatrie, Munich, Germany

### Molecular Neurobiology

**Marc Ballivet**, University of Geneva, Geneva, Switzerland

**Tamas Bartfai**, University of Stockholm, Stockholm, Sweden

**Xandra Breakefield**, Shriver Center, Waltham, Massachusetts

**Michael Brownstein**, National Institute of Mental Health, Bethesda, Maryland

**Fernando M. A. Correa**, University of Sao Paulo, Ribeirao Preto, Sao Paulo, Brazil

**Claudio Cuello**, McGill University, Montreal, Canada

**John W. Daly**, National Institutes of Health, Bethesda, Maryland

**Mark Darlison**, University of Hamburg, Hamburg, Germany

**Lee E. Eiden**, National Institute of Mental Health, Bethesda, Maryland

**Harold Gainer**, National Institutes of Health, Bethesda, Maryland

**John Kebabian**, Research Biochemicals International, Natick, Massachusetts

**Helmuth Kettenmann**, Max-Delbrück-Centrum für Molekulare Medizin, Berlin, Germany

**Yoichiro Kuroda**, Tokyo Metropolitan Institute for Neurosciences, Tokyo, Japan

**Jacques Mallet**, Centre National de Recherche Scientifique, Gif-sur-Yvette, France

**Mark McNamee**, University of California at Davis, Davis, California

**Katsuhiko Mikoshiba**, University of Tokyo, Tokyo, Japan

**Enrique L. M. Ochoa**, University of California, Davis, California

**Gavril Pasternak**, Memorial Sloan-Kettering Cancer Center, New York, New York

**Andre Sobel**, INSERM, Paris, France

*Cellular and Molecular Neurobiology* is published bimonthly at 1 Alanbrooke Road, Belfast BT6 9HF, Northern Ireland, by Plenum Publishing Corporation, 233 Spring Street, New York, N.Y. 10013. In 1998, Volume 18 (6 issues) will be published. *Cellular and Molecular Neurobiology* is abstracted or indexed in Beck Medical Information, Biological Abstracts, Cambridge Scientific Abstracts, Chemical Abstracts, Current Awareness in Biological Sciences, Current Contents, and Excerpta Medica. © 1998 Plenum Publishing Corporation. *Cellular and Molecular Neurobiology* participates in the Copyright Clearance Center (CCC) Transactional Reporting Service. |-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Effects of Antimitotic Agents on Secretion and Detergent Extractibility of Adrenal Nicotonic Acetylcholine Receptors<br><i>Isabel Lopez and Dennis B. McKay</i>                                                                                                                                                                                             | 447 |
| Selective Chronic Sodium or Chloride Depletion Specifically Modulates Subfornical Organ Atrial Natriuretic Peptide Receptor Number in Young Rats<br><i>Patricio E. Ray and Juan M. Saavedra</i>                                                                                                                                                             | 455 |
| Nitric Oxide Participates in the Stimulatory and Neurotoxic Action of Endothelin on Rat Striatal Dopaminergic Neurons<br><i>Hiroto Shibaguchi, Yasufumi Kataoka, Shuichi Koizumi, Masami Kohzuma, Motoo Obana, Akihiko Himeno, Kimihiro Yamashita, and Kohtaro Taniyama</i>                                                                                 | 471 |
| Binding of Aminoalkylindoles to Noncannabinoid Binding Sites in NG108-15 Cells<br><i>Sheryl Stark, Mary A. Pacheco, and Steven R. Childers</i>                                                                                                                                                                                                              | 483 |
| The Cyclin-Dependent Kinase (cdk) Inhibitors, Olomoucine and Roscovitine, Alter the Expression of a Molluscan Circadian Pacemaker<br><i>Nancy A. Krucher, Laurent Meijer, and Michael H. Roberts</i>                                                                                                                                                        | 495 |
| A Time-Dependent Increase in Glial Fibrillary Acidic Protein Expression and Glutamine Synthetase Activity in Long-Term Subculture of the GL15 Glioma Cell Line<br><i>Giuseppe Moretto, Nadia Brutti, Verena De Angelis, Cataldo Arcuri, and Virginia Bocchini</i>                                                                                           | 509 |
| <sup>1</sup> H NMR Ganglioside Ceramide Resonance Region on the Differential Diagnosis of Low and High Malignancy of Brain Gliomas<br><i>V. Lombardi, L. Valko, M. Valko, A. Scozzafava, H. Morris, M. Melnik, J. Svitel, M. Budešinský, J. Pelnár, J. Steno, T. Liptaj, L. Zalibera, J. Budinská, J. Zlatoš, A. Giuliani, L. Mascolo, and D. Leibfritz</i> | 521 |
| Prion Protein Is Necessary for Latent Learning and Long-Term Memory Retention<br><i>Noriyuki Nishida, Shigeru Katamine, Kazuto Shigematsu, Akira Nakatani, Nobuhiro Sakamoto, Sumitaka Hasegawa, Ryota Nakaoke, Ryuichiro Atarashi, Yasufumi Kataoka, and Tsutomu Miyamoto</i>                                                                              | 537 |
| Molecular Mechanisms Underlying Forskolin-Mediated Up-regulation of Human Dopamine D <sub>2L</sub> Receptors<br><i>Maria H. Wanderoy and Anita Westlind-Danielsson</i>                                                                                                                                                                                      | 547 |
| SHORT COMMUNICATION                                                                                                                                                                                                                                                                                                                                         |     |
| Immobilization Stress Increases mRNA Levels of Interleukin-1 Receptor Antagonist in Various Rat Brain Regions<br><i>Eiji Suzuki, Futoshi Shintani, Shigenobu Kanba, Masahiro Asai, and Toshio Nakaki</i>                                                                                                                                                    | 557 |

## CONTENTS

### Special Issue: The Nervous System as a Secondary Sexual Character

Guest Editor: Carlos Libertun

#### INTRODUCTION TO THE SPECIAL ISSUE

- The Male and Female Nervous System or the Nervous System as a Secondary Sexual Character 563  
*Carlos Libertun*

#### PAPERS

- Ontogeny of Sex Differences in the Mammalian Hypothalamus and Preoptic Area 565  
*Stuart A. Tobet and Iris K. Hanna*
- Gender-Specific Steroid Metabolism in Neural Differentiation 603  
*John B. Hutchison*
- Prenatal Hormones Organize Sex Differences of the Neuroendocrine Reproductive System: Observations on Guinea Pigs and Nonhuman Primates 627  
*John A. Resko and Charles E. Roselli*
- Sex Differences in the Nervous System of Reptiles 649  
*John Godwin and David Crews*
- Sex Difference in Glucocorticoid Regulation of Vasopressin mRNA in the Paraventricular Hypothalamic Nucleus 671  
*Monica G. Ferrini, Claudia A. Grillo, Gerardo Piroli, E. Ronald de Kloet, and Alejandro F. De Nicola*
- Neonatal Androgen and Estrogen Treatments Masculinize the Size of Motoneurons in the Rat Spinal Nucleus of the Bulbocavernosus 687  
*S. Marc Breedlove*
- Brain Sexual Differentiation and Gonadotropin Secretion in the Rat 699  
*Damasia Becú-Villalobos, Arturo González Iglesias, Graciela Díaz-Torga, Pablo Hockl, and Carlos Libertun*
-
